

Trumark® Slingshots

TRUMARK® have been making slingshots in the USA since the early 1960's and have a reputation for quality, reliability and accuracy. Trumark slingshots have a wide range of options from non-folding to fibre-optic sights, and are uniquely distinguished from Far-Eastern slingshots in that they are made out of aluminium, giving better balance and weight; more importantly, the joints where the rubbers meet the arms are rounded, so they do not cut the elastic causing it to tear. All slingshots except TWS-1 will accommodate ammo in the handle.
